EDUCATION

Siksha 'O' Anusandhan (ITER)

B.Tech in Computer Science and Engineering

CGPA: 9.3 / 10.0

2023 – 2027 | Bhubaneswar, India

Gangadhar Meher Higher Secondary School

Class XII (CHSE)

Percentage: 79.83%

2020 – 2022 | Sambalpur, India

SKILLS

Languages: JavaScript, TypeScript, Java, Python, PostgreSQL, MongoDB, HTML5/CSS3

Frameworks/Libraries: Next.js, React.js, Node.js, Express, Tailwind CSS, Redux, NumPy, Pandas, Scikit-learn

Tools & Technologies: Docker, Kafka, Kong API Gateway, HashiCorp Vault, Prometheus, Grafana, ELK Stack, Redis, AWS, WebSockets

Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, Machine Learning

EXPERIENCE

CNX10 ITER (Technical Club)

Backend Engineer

Jan. 2024 – Present

Bhubaneswar, India

- Architect and deploy server-side logic using **Node.js** and **Express**, supporting community-led projects for 500+ active members.
- Optimized **MongoDB** performance via indexing and schema normalization, reducing API response times by 20%.

PROJECTS

LMS Microservices Platform | [GitHub](#)

Oct. 2025 – Present

- Architected a scalable LMS using **microservices** (Node.js, TypeScript), securing 10+ endpoints via **Kong API Gateway** & **HashiCorp Vault** for 1,000+ concurrent users.
- Designed an **event-driven** pipeline with **Kafka** & **Redis**, processing 5,000+ events/sec with sub-50ms cache latency.
- Implemented **observability** with **Prometheus**, **Grafana**, and **ELK Stack**, reducing MTTR by 50%.

LogicForge — Real-time Multiplayer Coding Arcade | [GitHub](#)

Feb. 2026 – Present

- Architected a **microservices** platform with Next.js, Node.js, and **Go** (Turborepo) with a secure API Gateway and custom rate-limiting for multiplayer traffic.
- Built a sandboxed code-execution engine in **Go** for untrusted submissions, synchronized globally via **WebSockets**.
- Developed a real-time **anti-cheat telemetry** service monitoring keystroke patterns and assigning risk scores to neutralize exploits.

ACHIEVEMENTS

- Runner-up at college-level **Smart India Hackathon** finals, recognized for technical proficiency in real-world software solutions.
- Mentored **45+ students** in Backend and Frontend development through workshops, code reviews, and debugging sessions.
